EXPERIENCE

NetStar Overseas Software LLC, Front-End Developer   Jan 2024 – Present

- Transitioned from Intern to Full-time Developer based on strong performance (promoted within 5 months).
- Built and customized WordPress websites, optimizing user journeys and reducing bounce rates by 15%.
- Delivered fully responsive, cross-browser compatible designs optimized for 98% of devices.

Oasis Infobyte, Front-End Developer Intern   Jun 2023 – Aug 2023

- Devised 3+ web applications, highlighting frontend skills with React and Tailwind CSS.
- Collaborated with a team of developers, adapting to agile workflows and real-world client scenarios.
- Completed all project sprints on time, improving project delivery speed by 20%.

PROJECTS

Celigo Integration – NetSuite + WooCommerce
Developed end-to-end integration flows between WooCommerce and NetSuite using Celigo iPaaS for two eCommerce brands – Viper and PinkBox.

- Automated data sync for orders, fulfillments, and RMAs — reducing manual work.
- Configured and optimized flow mappings, scheduling, and error handling in Celigo Integrator.io to ensure seamless, real-time updates.
- Collaborated with business and tech teams to enhance NetSuite workflows and SuiteScripts for better eCommerce data consistency.

Reorder Functionality – SuiteCommerce (NetSuite)
Developed a custom "Reorder" feature in SuiteCommerce to enhance user experience and streamline repeat purchases.

- Implemented logic using SuiteScript and Backbone.js to allow customers to reorder previously purchased items directly from their order history.
- Customized SuiteCommerce templates and front-end components for a seamless and responsive UI.
- Tested, debugged, and deployed with backend and QA teams.
